

(1) “Charlie and the Chocolate factory” by Roald Dahl

Mr Wonka and the Indian Prince

*‘Prince Pondicherry wrote a letter to Mr Willy Wonka,’ said Grandpa Joe, ‘and asked him to come all the way to India and build him a **colossal** palace entirely out of chocolate.’*

‘Did Mr Wonka do it, Grandpa?’

‘He did, indeed. And what a palace it was! It had one hundred rooms, and everything was made of either dark or light chocolate! The bricks were chocolate, and the cement holding them together was chocolate, and the

windows were chocolate, and all the walls and ceilings were made of chocolate, so were the carpets and the pictures and the furniture and the beds; and when you turned on the taps in the bathroom, hot chocolate came pouring out.

‘When it was all finished, Mr Wonka said to Prince Pondicherry, “I warn you, though, it won’t last very long, so you’d better start eating it right away.”’

*“Nonsense!” shouted the Prince. “I’m not going to eat my palace! I’m not even going to **nibble** the staircase or lick the walls! I’m going to live in it!”*

‘But Mr Wonka was right, of course, because soon after this, there came a very hot day with a boiling sun, and the whole palace began to melt, and then it sank slowly to the ground, and the crazy prince, who was dozing in the living room at the time, woke up to find himself swimming around in a huge brown sticky lake of chocolate.’

(2) What Is Renewable Energy

Renewable energy sources are types of energy that constantly refill.

What Are Examples Of Renewable Energy

The most common types of renewable energy include:

- solar energy (produced by the sun and captured in solar panel systems)
- wind energy (produced by the wind and captured through wind turbines)
- geothermal heat (derived from heat in the earth's core and captured through geothermal power pumps that drill holes into rocks to capture steam)
- rain or snow (which can flow into streams and be captured and turned into hydroelectric power).

Facts About Energy And Renewable Energy

Here are facts about energy and renewable energy:

- Wind speed has to be more than 13 miles per hour for a wind turbine to convert wind into electricity.
- The biggest solar power plant in the world is in California, in the middle of the Mojave Desert.
- Hawaii is home to the biggest wind turbine in the world.
- More than 6 million homes in the U.S. are heated and/or cooled by geothermal energy.
- Converting manure (animal droppings) into energy is known as biomass, and it is becoming very popular.

(3) The flu

The flu is a disease. Sneezing and coughing can spread the germs that cause the flu. Doctors are studying the problem.

They give these tips: Cover your mouth when you sneeze or cough so germs do not **spread**. When you touch things that have flu germs on them, the germs get on your hands. They get in your body when you rub your eyes or touch parts of your face.

So, wash your hands often. If you follow these tips, you will help prevent flu germs from spreading.

(2) My hometown

I come from a small town called Sur. First of all, it's very green and has many beaches and mountains. My hometown has a very small population and the people are very friendly. It also has a small city center and you can find many shops and restaurants, for example, sea food restaurants and supermarkets. Furthermore, my hometown is a coastal town; as a result, there are many boats and ships made by a small traditional wooden ship factory. In addition, there are many fishermen around so you can eat many kinds of cheap fish. It's very hot in the summer and warm in the winter. There are many parks and museums in my hometown. Many tourists visit my hometown in the winter time because of the pleasant weather and because they want to see the turtles and their little ones.

It is your turn now to write about your hometown below (60-80 words)
